PROFESSIONAL SUMMARY

cybersecurity graduate and aspiring web developer with a focus on building secure, user-facing applications. combining defensive CyberOps expertise with front-end fundamentals in HTML5 and CSS grid to bridge the gap between technical security and high-performance design. proven leadership as secretary of the Indiana tech cybersecurity society, dedicated to implementing secure design principles throughout the software development life cycle.

EDUCATION

Bachelor of Science in Cybersecurity, Indiana Institute of Technology

Graduation Expected: May 2026

GPA:3.2 | Honors: Dean's List (Fall 2024, Spring 2025, Fall 2025)

Relevant Coursework: Defensive CyberOps, Offensive CyberOps, Network & Web Analysis, Disaster Recovery, Script Programming, Web Development, Generative AI & Engineering Prompt.

EXPERIENCE & LEADERSHIP

Secretary, Cybersecurity Society

11/2025 – 05/2026

- Record meeting minutes and maintain official executive documentation.
- Manager communications and coordination with the Student Executive Board (SEB).
- Track attendance and ensure organizational compliance for executive members.

Athletic Student Worker, Indiana Institute of Technology

09/2025 – 05/2026

- Assisted with event logistics, admissions, and entry gate security for home games.
- Collaborated with event staff to support scoreboard operations and facility safety.

Parking Attendant, Fort Wayne TinCaps

5/2020 – 9/2022

- Coordinated with Public Safety departments to ensure secure and efficient facilities operations.
- Communicated safety procedures to visitors to maintain a secure environment.

SKILLS

- **Technical Skills:** Wireshark, Nmap, Magnet AXIOM, FTK Imager, Cisco Packet Tracer, Python, Bash, SQL, Linux (Kali), Windows, OpenSSL.
- **Soft Skills:** Technical Documentation, Problem Solving & Critical Thinking, Time Management & Organizing, Meeting Deadlines, Data Documentation, Results-Oriented & Independent, People-Oriented & Flexible

TECHNICAL PROJECTS

Cybersecurity Project I , Wireshark Network Analysis

01/2025- 05/2025

- Monitored network traffic across 100+ endpoints using Wireshark to detect anomalies.
- Applied protocol filters (ICMP, SSH, TCP, FTP) to identify critical vulnerabilities.
- Implemented real-time monitoring techniques to reduce unauthorized access risks.

Cybersecurity Project II, Secure Web API

03/2026 - 4/2026

- Implemented TLS 1.3 and HSTS security headers in a Node.js environment to mitigate Credential sniffing and downgrade attacks.
- Conducted packet-level audits using Wireshark to identify and remediate Application Layer cleartext vulnerabilities.

Crime Scene Investigation & Digital Forensics Project

01/2024 – 06/2024

- Conducted simulated criminal forensic investigation.
- Authored Search Warrant Affidavit and maintained Evidence Chain of Custody.
- Analyzed artifacts using Magnet AXIOM and FTK Imager.

User Account Management Script, Script Programming

08/2025 – 09/2025

- Developed Python automation for account creation, modification, and deletion.
- Improved administrative efficiency using conditional logic and file handling.

Create Your Own Website, Web Development 1

03/2026 – 04/2026

- Engineered a 10-page educational website using HTML5, CSS3, and JavaScript to instruct users on identifying job market scams.
- Implemented responsive design via external Style Sheets and integrated interactive prototypes, including secure-entry forms for scam reporting.
- Developed functional JavaScript-driven interfaces and data collection forms to simulate real-world user interactions and payment processing workflows.
