## PROFESSIONAL SUMMARY

Web Developer and Cybersecurity senior at Indiana Institute of Technology with a focus on building secure, high-performance web applications. Proficient in front-end and back-end fundamentals, including HTML, SQL, and Python, with a specialized transition into modern web frameworks. Demonstrated leadership as Secretary of the Cybersecurity Club, applying rigorous technical documentation and secure design principles to the full software development life cycle.

---

## EDUCATION

Bachelor of Technology in Cybersecurity, Indiana Institute of Technology
Graduation Expected: May 2026
GPA:3.1 | Honors: Dean's List (Fall 2024, Spring 2025, Fall 2025)
Relevant Coursework: Defensive CyberOps, Offensive CyberOps, Network & Web Analysis,
Digital Forensics, Crime Scene Investigation, Disaster Recovery, Script Programming, Web Development,
Generative Al & Engineering Prompt.

---

## EXPERIENCE & LEADERSHIP

**Secretary,** *Cybersecurity Society* *11/2025 - Present*

- Record meeting minutes and maintain official executive documentation.
- Manager communications and coordination with the Student Executive Board (SEB).
- Track attendance and ensure organizational compliance for executive members.

**Athletic Student Worker***, Indiana Institute of Technology* *09/2025 - Present*

- Assisted with event logistics, admissions, and entry gate security for home games.
- Collaborated with event staff to support scoreboard operations and facility safety.

**Parking Attendant,** *Fort Wayne TinCaps* *5/2020 – 9/2022*

- Coordinated with Public Safety departments to ensure secure and efficient facilities operations.
- Communicated safety procedures to visitors to maintain a secure environment.

---

## SKILLS

- **Technical Skills:** Wireshark, Nmap, Magnet AXIOM, FTK Imager, Cisco Packet Tracer, Python, Bash, SQL, Linux (Kali), Windows, OpenSSL.

- **Soft Skills:** Technical Documentation, Problem Solving & Critical Thinking, Time Management & Organizing,

  Meeting Deadlines, Data Documentation, Results-Oriented & Independent, People-Oriented & Flexible

## TECHNICAL PROJECTS

**Cybersecurity Project I ,** *Wireshark Network Analysis* *01/2025- 05/2025*

- Monitored network traffic across 100+ endpoints using Wireshark to detect anomalies.
- Applied protocol filters (ICMP, SSH, TCP, FTP) to identify critical vulnerabilities.
- Implemented real-time monitoring techniques to reduce unauthorized access risks.

**Cybersecurity Project II,** *Secure Web Apls* *03/2026 - 4/2026*

- Implemented TLS 1.3 and HSTS security headers in a Node.js environment to mitigate Credential.
  sniffing and downgrade attacks.
- Conducted packet-level audits using Wireshark to identify and remediate Application Layer cleartext vulnerabilities.

**Crime Scene Investigation & Digital Forensics Project** 01/2024 – 06/2024

- Conducted simulated criminal forensic investigation.
- Authored Search Warrant Affidavit and maintained Evidence Chain of Custody.
- Analyzed artifacts using Magnet AXIOM and FTK Imager.

**User Account Management Script**, *Script Programming* *08/2025 – 09/2025*

- Developed Python automation for account creation, modification, and deletion.
- Improved administrative efficiency using conditional logic and file handling.

**Create Your Own Website**, *Web Development 1* *3/2026 – 4/2026*

- Engineered a 10-page educational website using HTML5, CSS3, and JavaScript to instruct users on identifying job market scams.
- Implemented responsive design via external Style Sheets and integrated interactive prototypes, including secure-entry forms for scam reporting.
- Developed functional JavaScript-driven interfaces and data collection forms to simulate real-world user interactions and payment processing workflows.
